

The district will operate school breakfast, lunch, and special milk programs for the benefit of the regularly enrolled students of the district and authorized adults. The programs will be operated in compliance with all appropriate United States Department of Agriculture (USDA) regulations concerning the operation of food programs.

The programs will be financed through allowable regular or special funds in this district, including the Commodity Support Program. The programs will be operated so that their regular operating costs come from the state and federal programs as well as money collected from the sale of meals to students and adults. The price of the sale of meals to students and adults will be established annually by the board.

When necessary, the board may expend capital or operating funds for support of the programs, subject to the regular budgetary procedures of the district.
